Dear Delegates,

In India, the sickle cell gene is distributed mainly in Madhya Pradesh, Chhattisgarh, Maharashtra, Orissa, Jharkhand, parts of Andhra Pradesh, Kerala, Karnataka and Tamil Nadu. In some communities, the prevalence of the sickle cell trait is as high as 30% of the total population. In Chhattisgarh population prevalence is nearly 10%. Other hematological diseases particularly Beta Thalassaemia and hematological malignancies are also having high incidence in state of Chhattisgarh. The symposium will be useful in enlightening the clinicians, faculty research scholars and students on genetic basis of these disorders thus updating them on novel diagnostic and management approaches. The workshop will be aimed to enhance the skills of students, research scholars and faculty so that they would be able to utilize the knowledge in "Molecular Diagnostics" to design their research project which will prove beneficial for finding newer horizons of diagnosis and management of genetic disorders.

### **Raipur**

Founded by the Kalchuri King Ram Chandra of Raipur in the last quarter of the 14<sup>th</sup> century AD, Raipur is now the capital of Chhattisgarh. It is the biggest city of the Region and a fast developing important industrial centre. There are different places to visit in Raipur. In the holy genre, a couple of famous names are Jagannath Temple, Vallabhacharya Temple, Mandeval Temple Arang and ISKCON Temple. For a dose of serenity, head to Vivekanand Sarovar, Urja Park and Nandanvan Garden. Other spots such as Shadani Darbar, Rajeev Smriti Van, Nagar Ghadi, and Gandhi Udyaan also make for fine Raipur places to visit.
